Call for Papers & Undangan Peserta HIDIT 2026

21 Juli 2026

Yth. Bapak/Ibu (daftar nama terlampir)
IPB University

Dalam rangka mewadahi diseminasi hasil riset lintas disiplin berskala internasional yang mempertemukan akademisi, peneliti, dan praktisi dari berbagai bidang, kami akan menyelenggarakan International Conference on Heritage, Information, and Digital Transformation 2026 (HIDIT) dengan tema: **"Integrating Heritage, Information, and Social Resilience: Innovations for Nature, Memory, and Communities in Society 5.0."** Agenda utama akan dilaksanakan pada:

Hari/tanggal : Jumat - Sabtu, 23 - 24 Oktober 2026
Tempat : Gedung Auditorium FMIPA, Kampus IPB University, Bogor [Offline]
Zoom Meeting [Online]
Output : Publikasi Jurnal Ilmiah, Reference Book dan Prosiding

Sehubungan dengan hal tersebut, kami memohon perkenan Bapak/Ibu Pimpinan untuk dapat meneruskan informasi *Call for Papers* dan pendaftaran peserta ini kepada para staf dosen, peneliti, serta mahasiswa (Sarjana dan Pascasarjana) di lingkungan Fakultas, Departemen, maupun Pusat Studi yang Bapak/Ibu pimpin (*Terms of Reference* dan *Flyer* terlampir).

Informasi lengkap mengenai pengumpulan abstrak, biaya registrasi, dan lini masa kegiatan dapat diakses melalui situs resmi kami di [International Conference HIDIT 2026](https://internationalconferencehidit2026.apps.ipb.ac.id) atau dapat menghubungi kami melalui Email hidit@apps.ipb.ac.id dan WhatsApp 085283537220 [Admin Museum].

Demikian kami sampaikan, atas perhatian dan kehadirannya diucapkan terima kasih.

International Conference on Heritage, Information, and Digital Transformation 2026 (HIDIT)
“Integrating Heritage, Information, and Social Resilience: Innovations for Nature, Memory, and Communities in Society 5.0”

I. INTRODUCTION

The Digital Archive and Museum Management Unit of the Information Management and Digital Transformation Agency at IPB University (LMITD IPB) will host the International Conference on Heritage, Information, and Digital Transformation (HIDIT) in October 2026. The conference will be held in a hybrid format, both in person at IPB University and online, and will bring together academics, researchers, professionals, digital practitioners, and policymakers.

The conference aims to foster dialogue and collaboration at the intersection of cultural heritage, information systems, and digital transformation within the framework of Society 5.0. This approach emphasizes a human-centered society that integrates physical and digital spaces to balance economic progress with social and environmental solutions.

This year’s theme, **“Integrating Heritage, Information, and Social Resilience: Innovations for Nature, Memory, and Communities in Society 5.0,”** invites participants to examine how heritage preservation, information management, and digital technologies can together enhance the resilience of natural ecosystems, cultural memory, and communities.

The conference is set within the paradigm of Society 5.0, which integrates cyberspace and physical space to balance economic growth with social and environmental solutions. Unlike Industry 4.0, which focused on automation and efficiency, Society 5.0 prioritizes human needs and social resilience. In this context, the heritage sector is shifting toward more inclusive and meaningful innovation, guided by human-centricity, resilience, and sustainability. However, this transition brings challenges. Society 5.0 introduces risks that threaten national and local cultural narratives. Securing cognitive sovereignty, the ability of nations or communities to control their cultural narratives in digital spaces, has become an urgent concern.

Amid climate change, biodiversity loss, rapid urbanization, and the growing influence of artificial intelligence, our methods of documenting, interpreting, and sharing knowledge are changing significantly. However, technology alone is not sufficient. Lasting resilience depends on digital innovation that is rooted in local wisdom, participatory governance, and respect for diverse forms of memory, including oral traditions, institutional archives, museum collections, and community records.

The conference encourages reflection on several key questions: How can AI and digitization support human-centered innovation without erasing cultural specificity or increasing digital divides, and what ethical frameworks are needed to protect cultural authenticity? What roles do archives, storytelling, and cultural knowledge play in sustaining collective memory and identity during environmental change, and how can these be better represented in conservation frameworks? How can policy, climate adaptation, and community resilience be integrated with heritage and biodiversity governance, especially when customary ecological knowledge is often marginalized? Finally, how can galleries, libraries, archives, and museums (GLAM) become active centers for environmental knowledge and civic engagement, building on projects such as climate risk assessment, energy reduction, and AI-driven sustainability visualization?

By addressing those questions, HIDIT 2026 aims to move beyond techno-centric narratives and toward integrative, transdisciplinary approaches that honor the complex relationships between nature, memory, and communities in the digital age. The conference thus serves as a platform for critical reflection on how digital transformation can be harnessed not merely for efficiency, but for ecological and cultural flourishing in Society 5.0.

II. OBJECTIVE

HIDIT 2026 is structured around three core objectives, each intended to generate enduring impact beyond the event.

1. To facilitate the integration of cultural heritage, local knowledge, and digital technology.

The conference aims to develop actionable frameworks and research agendas that connect national and local knowledge systems with contemporary digital tools. Instead of positioning technology as a substitute for heritage, the objective is to promote integration that respects and enhances diverse epistemologies, from local ecological practices to digitized archival collections, while ensuring that local communities remain central to decision-making processes.

2. To foster interdisciplinary research collaboration across the humanities, technology, and policy sectors.

The conference actively encourages cross-sector dialogue among humanities scholars (including history, anthropology, and heritage studies), technology experts (such as computer science, information systems, and artificial intelligence), and policy practitioners (covering environmental governance, cultural regulations, and digital rights). By dismantling disciplinary silos, HIDIT 2026 seeks to initiate new collaborative projects, comparative studies, and innovative methodologies that address complex challenges at the intersection of heritage, information, and resilience.

3. To disseminate research publications and establish international networks.

Selected papers will be considered for publication in indexed proceedings, journal issues, or an edited volume. In addition to publication opportunities, the conference prioritizes developing a sustainable international network of researchers, practitioners, and institutions engaged at the heritage–information–resilience nexus. This network will provide a platform for ongoing knowledge exchange, mentorship, collaborative research initiatives, and policy advocacy, ensuring that the dialogues initiated at HIDIT 2026 continue to expand across borders and disciplines.

III. ACTIVITY DESCRIPTION

a. Date & Venue

Time : Friday-Saturday, October 23-24th 2026

Place : IPB University Darmaga Campus
(FMIPA Auditorium) and Virtual

Host : Information Management and Digital Transformation, IPB University

b. Theme

"Integrating Heritage, Information, and Social Resilience: Innovations for Nature, Memory, and Communities in Society 5.0"

c. Participant

The target audience consists of academics, researchers, professionals, digital practitioners, and policymakers from multiple countries. The expected number of participants is approximately 100.

IV. TOPICS IN PARALLEL SESSIONS

The conference features four parallel sessions, each addressing a key aspect of the main theme. We invite papers and presentations on, but not limited to, the following topics:

a. Parallel Session 1: Galleries, Libraries, Archives, and Museums (GLAM) for Knowledge and Information

Focus areas: galleries, libraries, archives, museums, and environmental humanities.

This session examines the evolving role of GLAM institutions as active contributors to environmental education, advocacy, communications, humanities, and communities.

b. Parallel Session 2: Heritage, Memory, and Cultural Wisdom

Focus areas: archives, storytelling, intangible heritage, and local knowledge system.

This session focuses on non-digital aspects of heritage, safeguarding oral traditions, community archives, and ecological knowledge.

c. Parallel Session 3: Digital Transformation and Artificial Intelligence

Focus areas: Artificial Intelligence, digitization, human-centered innovation.

This session examines how digital technologies, particularly artificial intelligence, are applied to heritage and information management.

d. Parallel Session 4: Resilient Societies for Nature and Biodiversity

Focus areas: policy, climate, community resilience, and biodiversity.

This session explores connections among social resilience, biodiversity conservation, and climate adaptation, focusing on how heritage supports communities facing environmental change.
